Wholesale Bulletin

TO: Authorized Bristol Compressors Wholesalers

DATE: January 8, 1998

SUBJECT: Compressor "Start Assist" Devices

Over the years it has become common practice to utilize certain "start assist" devices which have been made available for use on hermetic air conditioning compressors. While there are a number of these devices marketed and sold to our wholesale customers, we stand firm in the attempt to ensure that our compressors are used with only **those starting components that have been rigorously evaluated and subsequently approved for use with Bristol Compressors.**

In addition to those starting components listed in our Wholesale Catalog, (relays, start and run capacitors), **only those "start assist" devices marketed by KICKSTART listed below have successfully passed our testing procedures and received approval for use.**

<u>KICKSTART</u>	<u>Bristol Model Family</u>
KS1	H25A, H26A, H27A
KS2 (TO-5) 	H23A, H24A, H23B, H24B, H25B, H26B, H27B
KS3	H23B, H24B, H20C H21C, H20R, H21R

Use of other start components or devices without prior approval by Bristol Compressors is not recommended and may void warranty.
